Caring For Your Brewer

Regular cleaning keeps your Keurig® brewer running smoothly. Always be sure to turn off and unplug your brewer before cleaning.

Brewer Exterior
Keep your Keurig® brewer looking its best by cleaning the exterior from time to time. Just use a damp sponge or cloth, for non-alcohol-based cleaners. Never immerse the brewer in water or other liquids.

Drip Tray
The drip tray can hold up to 8 ounces of water in case of overflows and should be emptied and cleaned on a regular basis. To remove, slide it toward the front and lift. Rinse and clean with a damp, soapy, lint-free, non-alcohol-based cloth.

Water Reserve & Reserve Lid
The water reserve and water reserve lid should be periodically cleaned with a damp, soapy, non-alcohol-based cloth or sponge and rinsed with cold water after each use. For proper care, never immerse the water reserve or lid in water or other liquids.

Cleaning Entrance Needles
If a ring area in the bottom needle or anywhere else in the needle tends to become clogged, use a paper clip or similar tool to clean the needle. Never immerse the needles in water or other liquids.

To Remove Entrance Needles:
1. Turn the brewer off and unplug it.
2. Press the back button until the display shows “Descaling Your Brewer”. Use your fingers to remove the needles from the entrance needles area. (Use extreme care when removing needles. You can get burned if you touch hot needles.)

To Replace Entrance Needles:
1. Firmly plug in the brewer.
2. Turn the brewer on.
3. Press the back button.
4. Use your fingers to replace needles into entrance needles area.

Cleaning the Exit Needle
If there is a ring area in the exit needle, use a paper clip or similar tool to clean the needle. Never immerse the needle in water or other liquids.

Rinsing the Exit Needle:
1. Turn the brewer off and unplug it.
2. Press the back button and select “Default Language.
3. Select “Access Settings” and then “Display Settings”.
4. Turn the arrows to select “Personalize Touchscreen” and select.
5. Select “Screen Color” and select.
6. Select “Blue” and select.

Descaling Your Brewer

If you are using a Keurig® Water Filter, discard it and run two water-only brew cycles. Do not insert a K-Cup® pod.

TIP: Use a paper clip or similar tool to remove any coffee grounds. Lower the handle.

To De-scale Your Brewer:
1. Fill the water reservoir with fresh water to and not beyond the MAX line. Lift the handle. Push up while lowering the handle. Rinse thoroughly. Repeat until the water is clear.

Display
The display window will show “Auto On” and “Auto Off.”

Access Settings
Access the Access Settings menu to change your brewer settings. To see your current settings, press the “View” button. To change your current settings, press the “Save” button. To return to the Settings Menu, press the “Back” button.

Preferred Brew Settings
You can set your brewer to default to specific settings for each brewer button. To change your brew settings, see the instructions for your specific brewer on the Keurig® website or your brewer settings page for a full list of available KEURIG® settings.

Restore Factory Settings
You can restore your brewer to its original factory settings. Use your fingers or follow this procedure:

1. Press and hold the “Settings Menu” button for 20 seconds.
2. Press and hold the “Refuse” button for 20 seconds.
3. Release the “Settings Menu” button.
4. Release the “Refuse” button.

Warranty
Your new Keurig® brewer comes with a limited one-year warranty.

Limited One-Year Warranty
Keurig® brewers are high-quality appliances and, with proper care, last for many years. Your Keurig® brewer will be free of defects in materials or workmanship under normal home use for one year from the date of purchase. It is recommended that you keep your receipt to verify the purchase date.

Step Two: Descaling Rinses & Report
Rinse the brewing area until the back screen indicates “More Water Please.” Do not use a Keurig® pod. Let the back screen indicate “Descaling Procedure” and then launch the procedure.

Step Three: Fresh Water Rinse
Fill the water reservoir with fresh water to and not beyond the MAX line. Press the left arrow key to add fresh water. Rinse thoroughly. Place a large mug in the drip tray and run a cleaning brew to press the button.

Fully experience the benefits that come with your new Keurig® brewer at KEURIG.COM/NEW
**Before You Brew**

1. **Plug & Place**
   - Place a new pod into the brewer and plug in where grounded outlet.
   - Place a larger mug to accumulate the drip tray.

2. **Rinse & Fill**
   - Remove the water reservoir lid, fill it to the MAX line. Replace the reservoir, making sure the tab is engaged with the brewer. Replace the lid.

3. **Power On**
   - Press the power button to turn on the brewer.
   - Clean the drip tray and wipe the brew area with a damp cloth.
   - Leave the handle. Wait for preheating to complete, about 90 seconds.

4. **Cleaning Brew Setup**
   - Press the hot water button to start a rinsing brew.
   - The water reservoir should be emptied before you are ready to brew.

**Brew Your First K-Cup® Pod**

5. **Place Mug**
   - Place the mug on the drip tray. If using a travel mug, remove the divider – remove the drip tray before.

6. **Lift & Insert**
   - Lift the handle and place the K-Cup® pod in the cradle and push down. Replace the lid.

7. **Size & Strength**
   - Choose your brew size using the arrows on the screen. Select STRONG for select COCOA/OTHER.
   - Use the brew button to select the K-Carafe® pod.

8. **Brew & Enjoy**
   - The brewer will notify you when the brew cycle is complete.
   - Lift the handle and discard the used K-Cup® pod. The brewer should be operated on its own circuit, not overloaded with other appliances.

9. **Before You Brew**
   - Place a new pod in the pod holder and insert the Keurig® Carafe
   - Lift & Insert the handle and place the K-Carafe® pod in the cradle and push down. Make sure it is seated properly in its place.

**Set Carafe Auto Brew Mode**

1. **Select the K-Carafe® and place it in the pod holder.**
2. **Select AUTO BREW at 6:00**
3. **Select NEW CARAFE**
4. **Select the start time.**
5. **Select your size.**
6. **Select your cup size.**
7. **Set your preferences.**
8. **Set your coffee size.**

**Troubleshooting**

1. **Brewer Does Not Have Power or Shuts Off**
   - After placing a pod in the pod holder, make sure the handle is seated completely and the touch screen displays the appropriate screen.

2. **Brewer Shots Off Or Turns On Automatically**
   - Press the blinking "BREW" button. The touch screen will indicate "Time to Replace the Keurig® Water Filter" – your brewer will automatically perform a rinsing brew.
   - If the touch screen shows "ERROR, PLEASE PRESS RINSE," remove the water reservoir and fill the reservoir to the MAX line. Then fill the reservoir to the MAX line, return it to the brewer and ensure it is seated properly in its place.

3. **Touch Screen Alerts**
   - "Do Not Disturb!" – Refer to the Settings Menu.
   - "Sorry, There is a problem" – Coffee grounds may be stuck in the brewer. Replace the water reservoir and perform a rinsing brew without a K-Cup® pod.

4. **Brewer Will Not Brew**
   - If the touch screen shows "Brewing Coffee" – your brewer is set to auto on/off.

5. **Service**
   - Follow these steps to determine the necessary action for your brewer:
     1. **Service** – if the water reservoir is not working, check the water filter. Clean the reservoir and ensure it is seated properly in its place.
     2. **Service** – if the water reservoir is not working, check the water filter. Clean the reservoir and ensure it is seated properly in its place.
